FreeBSD
FOUNDATION

FreeBSD FOUNDATION

The FreeBSD Foundation is a 501(c)(3) non-profit organization dedicated to supporting and promoting the FreeBSD Project and community.

The FreeBSD Foundation is entirely supported by donations from people and companies like yours.

Donations are used to fund and manage development projects and developer summits, sponsor FreeBSD events, and provide travel grants to FreeBSD developers. The Foundation also represents the FreeBSD Project in executing contracts, license agreements, and other legal arrangements that require a recognized legal entity.

Your encouragement and financial support keeps the FreeBSD Project thriving. In this way, donors are able to provide substantial benefits to the FreeBSD Project.

Thank you for attending this conference. It shows your support for The FreeBSD community.

Your donation to the FreeBSD Foundation insures the continuation of benefits like these:

» Funding improvement and development projects, including: 64-bit ARMv8 support, a native in-kernel iSCSI stack, autofs-based automount daemon, UEFI system boot support, PCIe hot plug, Capsicum compartmentalization framework, OpenCrypto improvements, auditdistd improvements for the FreeBSD cluster, software development tool chain projects, and an updated system video console.

» Educating the public and promoting FreeBSD with tools like our high-quality FreeBSD 10.X brochure and company visits to help facilitate collaboration efforts with the Project.

» Sponsoring BSD conferences and summits in Europe, Japan, Canada, and the US.

» Protecting FreeBSD IP and providing legal support to the Project.

» Purchasing hardware to build and improve FreeBSD project infrastructure.

Join the growing list of donors and users of FreeBSD. Making a donation is quick and easy.
